+ Layout and spacing
+ Components
+ Pixel art: stickers and mascots
+ Seasonal decorations and theme button
+ Motion, accessibility, responsive
+ Page inventory
+ Examples: desktop
+ Examples: mobile
+ License and sources

Principles

+ **Grid look.** Thin 1 px lines divide the page into cells; one coloured grid panel carries the mascot and stickers.
+ **Dark only.** Near-black background, white text. Colour comes from the pink and violet accents and from the pixel art.
+ **Palette.** Pink and violet for surfaces and accents. Stickers keep their own bright colours (blue, green, yellow, red) so tool categories stay recognisable.
+ **Mascot.** Stuffy, a pink pixel axolotl, plus a cast of extra animals. None of them ever speaks: no speech bubbles.
+ **No filler copy.** Pages carry labels, state and data only, no marketing text.
+ **Motion is small.** The mascot bobs in two steps; everything stops under reduced-motion.
+ **Accessible by default.** WCAG 2.2 AA contrast, visible focus, touch targets of at least 44 px (48 px for icon buttons), real form controls and labels.
+ **Two languages.** German and English from the start; fonts are self-hosted in the real app.

Colors

Background
#101012 · page background
17.2 : 1 with light text

Text
#f4f4f0 · primary text, solid buttons
17.2 : 1 with dark text

Muted

Typography

SILKSCREEN · PIXEL

STUFFCLOUD SMALL TOOLS_

Wordmark and console-style headings. Never for body text. Open Font License (verify when self-hosting).

JETBRAINS MONO · LABELS AND CODE

k3x9q2mf.sites.test
000-000

Labels (12 px, capitals, letter-spacing 1 px), addresses, code, numbers. Open Font License.

INTER · INTERFACE AND TEXT

Your stuff, in your cloud.

Headings, buttons, long text. Open Font License.

ROLE	DESKTOP	MOBILE	WEIGHT
Page title	48 px, line 1.05, -1.2 px	36 px	500
Section title	28 px	28 px	500
Body	15 to 16 px, line 1.5 to 1.7	15 px	400
Label	12 px mono, capitals	12 px	400
Input text	15 px mono	16 px (no zoom on iOS)	400

Layout and spacing

+ **Frame.** One column, maximum width 1240 px, 1 px lines left and right. Header 64 px (56 px on mobile) with the wordmark cell, navigation cells and a right cell.
+ **Cells.** Content areas are separated by 1 px lines (#26262b), not by shadows or boxes. Tool and template grids use cells of at least 280 px.
+ **Split pages.** Main area plus a 360 px side column (settings, actions) with a violet grid panel at its foot.
+ **Grid panel.** Violet #8b5cf6 with 65 px grid lines (32 px on mobile) and two or three translucent blocks. The mascot sits on its bottom edge, stickers are scattered above with a white outline.
+ **Breakpoint.** One breakpoint at 760 px. Below it: menu button instead of navigation, single column, tables become cards, buttons stack, tab bars scroll with a fade.
+ **Spacing scale.** 4, 8, 10, 12, 16, 20, 24, 28, 32, 40, 56 px. Page padding 40 px (16 px mobile).
+ **Touch targets.** At least 44 px; icon buttons 48 px; fields 52 px; main buttons 52 to 56 px.
+ **Footer.** Mono line with license and links, pinned at the page end.

Buttons, fields, choices

BUTTONS

Solid | Ghost | Danger | Disabled | ×

FIELD AND SELECT

1.2 GB

That code is not valid. 2 attempts left.

You used 5.0 of 5 GB.

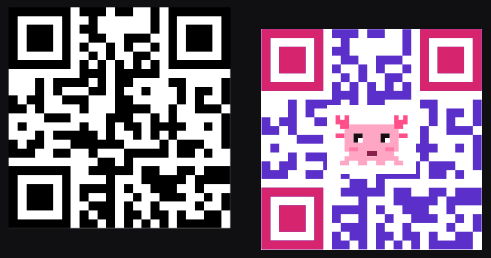

Special components

TWO-FACTOR CODE: 000-000

4 8 1 – 0 0 0

Six cells grouped 3 + 3 over one real input, so paste, autofill and screen readers keep working.

QR CODE STYLES

raw stuffcloud

Raw: black on white. stuffcloud: violet modules, magenta finder squares, mascot in the centre; needs error-correction level H and an automatic scan test, otherwise falls back to raw. PNG (1024 px) and SVG download.

DESTRUCTIVE ACTION

Delete site: a dialog with a typed confirmation of the subdomain; the pink button stays disabled until the text matches. The mascot sits on the dialog's top edge.

Stickers and mascots

TOOL STICKERS (OUTLINED IN WHITE WHEN PLACED ON THE PANEL)

	NAME	ANIMAL	EASTER EGG TRIGGER
	**Stuffy**	main mascot	home, tools, forms
	**Mochi**	cat	Konami code: walks along the bottom edge
	**Hop**	frog	tool finished: hops across the result
	**Bun**	bunny	rarely: peeks in from the edge
	**Bloop**	jellyfish	long jobs: floats in the progress bar
	**Waddle**	penguin	Dec to Feb: slides across the home page
	**Ember**	fox	burn after reading: appears when the page is consumed
	**Boo**	ghost	expired and 404 pages
	**Cumulo**	cloud	site published; click the logo 5 times: drifts across

Rules for pixel art

+ **One character = one pixel.** Sprites are ASCII art plus a palette, turned into SVG by `docs/design/tools/mascots.py`, `seasons.py` and `stickers.py`.
+ **Crisp.** SVG with `shape-rendering: crispEdges`; integer scaling where possible.
+ **Friendly.** Small dark eyes, pink cheeks, soft colours; no pupil-less white eyes, no large dark masses (the first cat and penguin looked unfriendly).
+ **Silent.** No speech bubbles; mascots express with pose only.
+ **Outline.** Stickers on the violet panel get a 2 px white outline (drop-shadow in four directions).
+ **Tilt.** Stickers rotate between -12 and +10 degrees for a scattered look.
+ **Motion.** Two-step bob (4 px up and down every 1.2 s), paused under reduced-motion.
+ **License.** Original art, GPL-3.0-or-later like the code.

Seasonal decorations

SET	WINDOW (GERMANY)	THEME BUTTON TEXT
Winter	Jan 3 to Feb 28, Dec 27 to 30	From Dec 21 the days get longer again.
New Year	Dec 31 to Jan 2	Happy New Year! A good moment to clear out old files and sites.
Valentine's Day	Feb 13 to 14	A day to tell people you care about them. Friends and family count too.
Carnival	Weiberfastnacht to Shrove Tuesday	A time for costumes, music and laughing together.
Women's Day	Mar 8	International Women's Day on March 8 celebrates women's achievements around the world.
Earth Day	Apr 22	Earth Day on April 22 started in 1970 and is celebrated worldwide.
Easter	two weeks before to Easter Monday	Eggs are an old symbol of new life and spring.
Europe Day	May 9	May 9 recalls the Schuman Declaration of 1950, the start of European cooperation.
Pride	Jun 1 to 30	Pride celebrates everyone's right to be who they are and love who they love.
Autumn	Sep 1 to Nov 30	Leaves turn red and orange when the green pigment fades and the other colours show.
Unity Day	Oct 3	October 3 marks German reunification in 1990.
Harvest festival	week of the first Sunday in October	A day to say thank you for the harvest and for what we have.
Halloween	Oct 24 to Nov 2	A time for costumes and carving pumpkins.
Nicholas Day	Dec 6	On December 6 children put out a boot and find small treats such as nuts and tangerines.
Human Rights Day	Dec 10	December 10 marks the day in 1948 when the Universal Declaration of Human Rights was adopted.
Advent	four Sundays before Christmas to Dec 23	Advent counts down to Christmas: one more candle is lit each Sunday.
Christmas	Dec 1 to Dec 26	A time to be with the people you care about.

How decorations work

+ Classes on an ancestor (`html` in production), for example `s-christmas s-advent-3`. No page needs changes.

+ Up to four parts: a few randomly scattered particles drifting slowly **behind** the content, a strip under the header or above the footer, a corner sprite, and an accessory on Stuffy. Extra animals wear the same accessory, scaled per animal.

+ **Spring and summer have no decoration.**

+ Priority: special days beat holidays, holidays beat seasons. Dec 6 and Dec 10 override Christmas; Advent adds the wreath on top of Christmas.

+ Moving dates are computed: Easter by the usual rule, Weiberfastnacht = Easter minus 52 days, Shrove Tuesday = Easter minus 47, Advent = the four Sundays before Dec 25 (one more candle per Sunday).

+ **Theme button.** A small pill with the theme icon and name in the bottom right corner opens a card with a few positive facts and a switch to hide decorations. Built with details/summary, so it works without script; closes with Escape.

+ Admin setting: auto by date, fixed set, or off. Visitors can switch decorations off. Never blocks content, takes no focus, stands still under reduced-motion.

Motion, accessibility, responsive

+ **Motion.** Mascot bob, easter eggs and decoration particles only; all disabled under `prefers-reduced-motion`.
+ **Contrast.** Text 4.5 : 1 or more on its background (see the colors page). Muted grey is used only for labels and hints.
+ **Keyboard.** Everything reachable and operable; focus is a 2 px white outline with 2 px offset; dialogs trap focus and close with Escape.
+ **Forms.** Every control has a visible label (or an accessible name for icon buttons); errors use role=alert and are not colour-only.
+ **Decorative images** (stickers, strips) have empty alt text; the mascot has a name as alt text.
+ **Mobile.** Single column below 760 px, 16 px page padding, 16 px input text, menu button, tables as cards, action buttons on one row, tab bars scroll with a fade.
+ **Performance.** Pixel art is SVG, a few hundred bytes each; heavy tool assets load lazily.
+ **Privacy.** No trackers, no stored IP addresses.

License and sources

+ Design, pixel art, stickers, mascots and decoration sprites: GPL-3.0-or-later, like the project.
+ Fonts: Silkscreen, JetBrains Mono and Inter, all under the SIL Open Font License; self-hosted in the real app (verify license files when adding them).
+ The third-party screenshots used as a mood reference at the start are not included.
+ Source files: `docs/design/` in the repository (README, THEME-TEXTS.md, prototypes, sprite tools). Mockups open in a Design canvas and are references to build from, not production code.
